Lee Quan Jin

Email: leedannyqj@gmail.com | **Mobile:** +60 17 531 4092 | **LinkedIn:** linkedin.com/in/leequanjin

Education

Bachelor of Software Engineering | GPA: 3.9 / 4.0 **Jul 2023 – Nov 2026 (Expected)**

Tunku Abdul Rahman University of Management and Technology (TAR UMT)

- **Awards:** President List 2023, Dean List 2024, Dean List 2025

Experience

Project Development Intern | Cardzone Sdn Bhd, Kuala Lumpur **Nov 2025 – Apr 2026**

- Troubleshot frontend and JasperReports issues using **HTML, CSS, JavaScript** and **Apache Velocity**, resolving problems involving fonts, report layouts, sizing and rendering.
- Developed automated unit tests for banking workflows using **Java, JUnit** and **Mockito**, mocking dependencies to validate system behavior across BSN, BMMB, HLBVN and VietBank.
- Implemented client-specific feature enhancements by customizing existing base product modules to meet new project-specific requirements.
- Supported VietBank's Java 21 migration by updating libraries, configurations, source/database utilities and bank-specific dependencies, followed by regression testing.

Projects

APUBCC DevMatch 2024 – Blockchain-based Healthcare Data Sharing Web Application | Champion

- Developed the React frontend for a blockchain-based healthcare data-sharing platform, allowing users to securely manage and share healthcare records.

ETH KL 2024 – Cross-Chain Blockchain Game | 1st Runner-Up

- Developed gameplay systems in Unity and integrated blockchain-based game assets (NFTs) across Scroll and Manta Sepolia to create a cross-chain game aimed at increasing blockchain adoption.

TAR UMT TVHackathon 2024 – AI-powered Journaling Application | 1st Runner-Up

- Built an AI-assisted journaling application using Flutter, Firebase and Gemini API, integrating AI-generated journal insights with cloud-based data storage and mood tracking.

Technical Skills

Programming Languages: Java, C++, JavaScript, Python, HTML/CSS
Frameworks & Libraries: React, JUnit, Mockito, Flutter
Databases: PostgreSQL, MySQL, Oracle, Firestore
Tools: Git, JasperReports, Apache Velocity
Additional Exposure: Docker, Jenkins, AWS
Languages: English, Chinese, Malay, Japanese (JLPT N1)
